

LOGISTICS DEPARTMENT
NATIONAL AVIATION UNIVERSITY
 INNOVATIVE EDUCATIONAL TECHNOLOGIES

GRADUATES OF THE UNIVERSITY HAVE HIGH CHANCES FOR SUCCESSFUL EMPLOYMENT

The graduates of Logistics Department typically begin their career on the position of the specialist of the logistics division at a production or trade enterprise and manage procurement or sales, transportation or warehousing of goods, arrangement of the distribution network or inventory.

The next stage is the operational activity of the group lead connected with analysis, planning and control of the goods flow from the producer to the consumer.

The following stage in career development is promotion to the position of head of logistics department, director or vice-president where the professional logistics manager acts as the systems integrator of the company's business processes.

Graduates can work as:

- specialists and managers of logistics departments (services) at production, trade, agricultural enterprises; financial institutions, banks, etc.;
- specialists of companies that render professional logistics services: at freight forwarding companies; at warehouse complexes and customs terminals; at transport logistics and distribution centers;
- consultants and experts at companies specialized in logistics consulting and outsourcing;
- managers of supply and distribution at various enterprises.

**LOGISTICS IS A UNIVERSAL
 TOOL OF MODERN
 BUSINESS**

Logistics is the anti-crisis major that is one of the most high-profile and highly paid in developed countries of the world.

The range of professional duties of logistics manager is very wide

On the one hand, the professional in logistics management needs to know and understand the rules of cargo transportation by all transport modes, customs operations, warehouse management systems and inventory management, production management, supply management and distribution of ready goods, modern information technologies, etc.

On the other hand, logistics manager is the type who coordinates logistics activity of any enterprise, collaborates with other companies (intermediaries, suppliers, carriers), manages people and processes with the aim of improving the given company's competitiveness.

Occupation of logistics manager requires systems thinking of a commander, analytical and organizational skills of a manager, developed communication skills of an artist, a flexible mind of a chess player and high results rating of an economist.

A logistics manager thinks about how to effectively manage cost, time, resource, inventory, space, etc.

Logistics Department at NAU was the first in Ukraine to start academic training of logistics managers and remains one of the few academic departments to **begin educating from the 1st year of study**. Logistics Department has a wide network of international partners and relies on the high-end global experience of logistics personnel professional training. It should be highlighted that the content of educational plan for logistics managers at Logistics Department fully complies with the standards of the European Logistics Association (ELA).

Academic staff of Logistics Department is a natural combination of experience and daring determination. Academic staff of the Department includes 3 professors, 11 associate professors and post-graduate students. The leading logistics industry professors from domestic and international logistics companies participate in the academic process.

Experience, professional qualities and loyalty to the ideas and principles of logistics result in professionalism which is reflected in the achievements of our students. The academic staff of the Department is regularly involved in commercial business projects. The expertise from those projects is implemented in the academic courses at the Department.

Students of logistics actively participate in research and scientific activity and have a hand in scientific and practical conferences, business seminars, logistics projects, olympiads, competitions, etc. Also it is possible to take part in the projects organized by the Ukrainian Logistics Alliance, a professional club of the leading logistics practitioners.

Active collaboration of Logistics Department with Ukrainian business environment allows support of students' internships with the sites for field study and encourages quick employment of graduate students.
